Power Pod 2.0

With Power Port

PARTS LIST

Qty.	Item
1	Power Pod w/ 60" wire
1	Flat Slotted Bracket – Universal Mounting Bracket
1	Fuse Holder
1	20 Amp Fuse
1	Butt Connectors
2	Socket Head Screws
1	Set Screw (for use with optional H/C Mount)
1	M4 x 16mm Socket head cap screw (for use with optional H/C Mount)
3	Washers (for use with optional H/C Mount)

Thank you for your purchase of the Formotion Power Pod™ 12-Volt Power Outlet! The Power Pod can be mounted almost anywhere there is a bolt or screw that will support the universal mounting bracket.

INSTALLATION

- 1) Choosing any two holes on the Power Pod that complement your mounting position, attach the universal mounting bracket and secure it to the Power Pod using the enclosed socket head screws. **TIP:** Make sure that you do not crimp the wire lead from the Power Pod with the mounting bracket.
- 2) Find a suitable bolt or screw on the vehicle that will fit through the opened slotted end of the universal bracket and secure it to this position using the existing bolts or screws and their washers if applicable. **TIP:** Pick the largest bolt or screw you can find that will fit through the bracket's slotted opening. This ensures a solid and strong mounting. Because the Power Pod is self grounding, a good solid "steel to steel" connection to the vehicle is required.
- 3) Once mounted to the vehicle, make sure that the Power Pod's cap can fully open so that access is to its 12-Volt opening is not impaired. **NOTE:** In most cases, mounting the Power Pod in this way will "self ground" the unit and no additional wiring is necessary. In some cases, you may find that the mounting location may not provide a proper "self" ground for the unit to operate (as in mounting in saddle bags or against plastic etc). In this case all that is required is to run an additional wire (use the trim piece that you cut from the Power Pod line)– stripped at both ends – one end attached to one of the screws holding the universal bracket to the Power Pod and the other end attached to a grounded bolt on the vehicle. In most cases any bolt to the frame will suffice, but any other grounded bolt is fine.

- 4) You may also use the optional H/C handlebar mount (sold separately) to mount your power pod to the handlebars. Available for 1” and 1.25” handlebars. Visit or call your Formotion dealer for details.
- 5) Run the Power Pod’s 60” power cord to your battery – trim or hide any excess wire length. Make sure as you hide the cord on the way to the battery, that your handlebars turn freely and that the cord does not come in contact with hot engine parts that may melt the wire over time.
- 6) At some point, before reaching the battery, attach (using the butt connector) the power cord to the in-line fuse holder. **TIP:** *Keeping the in-line fuse holder in an easy to access place (like under a side panel etc) rather than under the seat, may help you service the fuse easier in case of a blown fuse. In most cases, it’s easier to pull a side panel off than it is to remove a seat!*
- 7) Attach the Power Pod lead wire (with in-line fuse now already attached) directly to the battery’s positive terminal for power at anytime without using the key. The hot lead can also be run to the fuse box which will require using the ignition switch to “Accessory” or “ON” in some cases. **TIP:** *Always use the in-line fuse for safety.*
- 8) Insert the 20 amp fuse into the in-line fuse holder. Strap down with zip-ties any loose wires and you’re done!

Formotion Products Inc. offers a full line of 12-Volt Accessories for your Power Pod! Just visit us on the web at www.FormotionProducts.com and pick up a few cool goodies for your Pod today. But remember, extended use will require that the vehicle be running so as not to run down the battery. Just use common sense.

This product carries the full Formotion Products satisfaction and limited lifetime warranty as do all our products. You can always purchase any Formotion Product with full confidence – that’s why we say “BUILT FOR A LIFETIME”

Should you have any questions or require further assistance, please don’t hesitate to let us know.

Thank you for your purchase and enjoy your new Power Pod™.
