

Formotion INSTRUCTIONS

Clocks and Thermometers

PARTS LIST

Qty.	Item
1	Gauge
1	14mm socket head cap screw
1	5mm socket head cap screw
1	Beauty Ring (optional)
1	Chrome long mounting bar
1	3mm hex key

INSTALLATION

1. Set the time: Pull out the crown turn to set time then push the crown back in.
2. Install the clock or thermometer stem to the mounting bar using the 8mm socket head cap screw.
3. Mount the assembly to any 1/4" bolt on the bike.
4. Adjust the mount and gauge so that the gauge is in the correct orientation and is easily readable with the rider in a neutral position. Keep in mind the bracket can be bent to accommodate different applications and variations.
5. With the gauge in the correct position, snug down the socket head cap screw with the hex key provided. **DO NOT OVER TIGHTEN!**
6. Snug down the bolt/screw that you chose for your mounting area in step 2.

7. As an option you can mount the entire assembly or just the gauge directly to a p-clamp handlebar mount (part # H/C-75178).

NOTE: Formotion Thermometers are factory calibrated and should not require recalibration. Small visible bubbles or air pockets inside the unit are normal and allow the inside oil to expand and contract. Oil residue outside the gauge may be present from manufacturing and can simply be wiped off with a dry towel prior to use.

Formotion Technical Support can be reached at (415) 331-0400.

WARRANTY

To activate your warranty (see our website for details) please register your purchase at: www.FormotionProducts.com or Call Formotion Product Registration at 1-888-747-2218. You can also Fax or Mail the following information to us at:
