Formotion Provides On-Board Thermometer To Harley-Davidson

Formotion Thermometer Joins the Formotion Clock as a Genuine Harley Accessory

Mill Valley - California, July 15, 2004: Teaming with Formotion Products, Harley Davidson has released a newly designed thermometer that will compliment their existing clock, and match their speedometers and tachometers. Made from 316L Stainless Steel and polished to a mirror finish, the thermometer uses Formotion's exclusive liquid-filled technology to make the gauges impervious to vibration, and increasing the accuracy of the device. Both clock and thermometer use a K1 crystal lens for superior scratch and shatter resistance, and are waterproof rated up to 5 ATM (165 feet of water pressure).

Listed under their Multi-Fit category, the \$59.95 thermometer is a Genuine Harley Davidson accessory. Announced at their annual dealer show, and available immediately, the thermometer is available in black (P/N 75102-04) and silver (P/N 75104-04). Both gauges will be sold through any Harley Davidson Dealer worldwide or through Harley Davidson's web site.

Introduced in the summer of 2000, The Formotion Clock™ and The Formotion Thermometer™ have become the gauges of choice for riders around the world. Today, Formotion has become the quality leader in all high-endurance powersport vehicles with more than 100,000 units in use on such vehicles as boats, snowmobiles, golf carts, autos, trucks, planes and motorcycles. In addition to selling its own line, Formotion Products also provides motorcycle clocks to the Harley Davidson Motorcycle Company on an OEM basis. For more information about the Formotion Products line, see the website at www.formotionproducts.com, or contact Formotion Products at (415) 380-9574
