Formotion Goes Big Time

Sausalito – California June 2006: A professional-grade gauge, the Formotion Police SL™ is designed for the toughest working and riding conditions. Featuring the largest face on the market (40mm), the large, easy to read military-style design together with a Swiss ISA movement and Super-LumiNova® day/night markers, the Police SL blends utilitarian function with elegant design.

Waterproof to 10 ATM (330 feet), shockproof, and UV resistant, the Police SL’s beauty is more than skin deep. Its Swiss-made ISA™ movement is tough and accurate to +/- 2 seconds a year and guaranteed for 20 years of hard use. Face markings feature large, easy-to-read numbers and military time markers. The case is made from marine-grade 316L stainless steel that can withstand the harshest conditions. The retail price for the Police SL is \$98.00, and it comes with all mounting gear necessary to mount it on any ¼ inch (4-6mm) bolt on the bike.

Formotion clocks have long been used by law enforcement officers—both on and off the job. Formotion clocks have found their way onto everything from Marine Corps “Roadhog” helicopters in Afghanistan to Harley Davidson™ Police motorcycles on a freeway near you. Professionals demand the best, and Formotion continues to raise the bar of beauty, functionality, and durability.

Formotion has been making fine timepieces for the motorcycle and motorsports enthusiast for the last 6 years. As the first company to manufacture analog timepieces for motorcycles, Formotion designed its onboard clocks to withstand intense vibration, constant exposure wind, sun and rain, and extreme temperature changes. Today Formotion manufactures onboard clocks for The Harley Davidson Motor, Company, Victory Motorcycles, and sells its own line for use on everything from motorcycles to snowmobiles, personal watercraft and hot rods. For more information about the Formotion Products line, see the website at www.formotionproducts.com, or contact Formotion Products at (415) 331-0400.
