# Big & Bold On Your Wrist

---

**Sausalito – California June 2005:** Building on its success with onboard motorcycle gauges, Formotion Products has pre-released, exclusively to power sports riders, the “N-Wave™” chronograph. This watch looks like nothing else on the planet. With the finest quality high chrome shine, the N-Wave case is also extremely corrosion resistant thanks to the same marine grade 316L stainless steel used in the Formotion Signature Series Thermometers and Clocks. The thick K1 watch crystal adds durability and beauty while keeping the Citizen™ full chronograph movement dry in up to 5ATM (165 feet) of water pressure. The N-Wave also incorporates a date window, and is available in a red, black, or white face with a retail price set at \$185. Its large format, and unique face define a style that is one of a kind.

“The N-Wave has an innovative design that’s unlike anything out there. We took them to the largest U.S. Powersports trade show and sold out of the inventory we were going to use for market testing. The leaders of our industry love the N-Wave. I think we got the message.” commented Formotion’s Peter Harvey.

When an aircraft flies supersonically, pressure waves are formed and coalesce into an “N-Wave”. When these waves react to with the atmosphere, a sonic “boom” is created. The N-Wave watch announces itself—but to the eyes instead of the ears.

Formotion is the leading provider of analog time and temp gauges for high-endurance powersports vehicles with more than 100,000 gauges on the road today. In addition to selling its own line, Formotion Products also provides motorcycle clocks and thermometers to the Harley
